

YEAR 2024/2025

IMPACT REPORT

Transforming Healthcare
Across Emerging Markets

THE EVERCARE IMPACT REPORT

showcases the Group's holistic and unified approach to healthcare, one that goes beyond clinical excellence to encompass environmental stewardship, social transformation, and robust governance. As Evercare continues to deliver quality care in emerging markets, this report reflects our commitment to integrating patient well-being, sustainability, and accountability across all levels of our operations.

At the heart of Evercare's mission is the belief that access to quality healthcare is a fundamental human right. Our impact-first model is designed to deliver private, patient-centred care that responds to local needs while contributing to the global Sustainable Development Goals. Through this work, we are helping to ensure health and well-being for all ages, an essential foundation for inclusive, long-term economic development.

01. **Governance and Ethics: The Foundation of Our Integrity**

We strengthened our governance frameworks, enhanced transparency, and deepened ethical oversight. From certifications and clinical audits to procurement and patient rights, our systems are designed to uphold trust and accountability.

02. **Social Impact: Transforming Lives and Health Systems**

We delivered care to the underserved, empowered our workforce, and partnered with communities to strengthen local health systems. Our patient stories, outreach programmes, and leadership development efforts reveal the depth of our social impact.

03. **Environmental Stewardship: Building Green, Resilient Healthcare**

We continued to reduce our environmental footprint through green buildings, solar energy, efficient water use, and waste recycling. Sustainability is embedded not just in our infrastructure but in the way we deliver healthcare every day.

Evercare operates as a unified healthcare platform in Pakistan, Kenya, and Nigeria. Our expanding footprint includes 5 hospitals, 20 medical centres, and 175 diagnostic centres, offering comprehensive, accessible, and patient-focused care.

We are wholly owned by the Evercare Health Fund, a healthcare fund dedicated to emerging markets. Managed by TPG, the Fund is backed by some of the world's leading impact investors and development finance institutions.

MESSAGE FROM **IRFAN KHAN, CEO,** THE EVERCARE GROUP

In 2024, the Evercare Group continued to pursue its mission in some of the most complex healthcare environments in the world. In Nigeria, Kenya, and Pakistan, markets where political instability, workforce migration, economic volatility, and infrastructure challenges make care delivery difficult, we remained steadfast in our belief that access to quality healthcare is a fundamental right.

These countries, classified as lower-middle-income economies with average annual incomes well below the global average, are often overlooked by multinational providers. Yet Evercare has chosen to deepen its presence. Since 2019, the Evercare Health Fund has invested more than \$107 million to build and strengthen healthcare systems in these regions. No dividends have been taken; instead, all proceeds have been reinvested to expand our footprint, hire local talent, and enhance infrastructure despite headwinds like inflation, currency depreciation, and a global pandemic.

In 2024, we provided more than 3.8 million patient services across our hospitals and medical centres, a 2.3 million increase since 2020, including over 780,000 inpatient and outpatient visits. We have also created more than 4,000 local jobs and expanded our facilities to include new ICUs, Cath labs, chemo units, surgical floors, and stroke centres.

Our long-term, mission-driven commitment also extends to governance. We believe safe care is built on strong systems, not just good intentions. Every Evercare facility is supported by four dedicated board subcommittees and strengthened through clinical governance mechanisms such as root cause reviews, Quality and Sustainability Committees, Medical Advisory Committees, and real-time data tracking via our Hospital Information System. Patient rights are protected through visible charters, trained staff, and dual whistleblower channels, including our independently managed 'Your Voice Matters' platform, through which 128 reports were submitted and addressed in 2024 underscoring our commitment to transparency, accountability and continuous improvement.

This work is not easy, but it is necessary. Our teams continue to bridge the last mile with compassion, running health talks, outreach programmes, and lifesaving surgeries for those who would otherwise go unseen. Through every challenge, we remain committed to creating systems that are not only resilient, but just.

Looking ahead, our vision remains clear: to transform healthcare in emerging markets by investing in people, systems, and infrastructure, always with purpose, and always with integrity, passion and access at the core.

01

GOVERNANCE AND ETHICS THE FOUNDATION OF OUR INTEGRITY

In 2024, Evercare strengthened its governance systems across all countries, hospitals, and clinics. We focused on transparency, accountability, and ethical leadership to support consistent and safe care.

Each hospital is supported by an Asset ESG Officer who connects operations with leadership and integrates ESG priorities into daily functions. Quarterly board meetings, ESG project trackers, and the EMEX compliance platform allowed real-time monitoring of risk, safety, environmental performance, and ethics.

ESG Officer Structure

1 ESG Officer per hospital

4 ESG trackers completed quarterly by each hospital

Local governance is reinforced through active boards and specialised committees at each facility. Our first Group-wide leadership and Board meeting in Pakistan helped align ESG goals, digital transformation efforts, and clinical governance priorities across markets.

"Integrity is embedded in how we lead, measure, and deliver care across the Group."

We improved internal audits, procurement controls, and whistleblower protections across all regions. Over 2,500 staff participated in mandatory governance and compliance training, including ethics workshops and integrity audits. Our Code of Conduct continues to guide decision-making at all levels.

03

GOVERNANCE & COMPLIANCE TRAINING: 2,500+ STAFF TRAINED ACROSS THREE COUNTRIES

Evercare hospitals met international quality and safety standards. Evercare Hospital Lahore maintained its accreditation by the Punjab Healthcare Commission. Evercare Hospital Lekki advanced its JICA accreditation journey. Avenue Healthcare retained ISO 900:2025 and achieved ISO 15189:2022 accreditation for its medical laboratories. Hospitals also met national and regional standards from HEFAMAA, PHC, and NNRA.

Avenue Healthcare (Kenya)	Evercare Hospital Lekki (Nigeria)	Evercare Hospital Lahore (Pakistan)
Level 5 COHSASA accredited	SAFECARE certified IFC EDGE certified	PHC-accredited
	 	

Data privacy and cybersecurity frameworks were further strengthened. Key investments included upgraded hospital information systems, firewalls, EMRs, and digital hygiene training for staff.

Our approach to governance is practical and consistent. Through clear policies, regular monitoring, strong leadership, and staff training, we ensure that ethical standards are upheld across the Group, every day, in every location.

SOCIAL IMPACT TRANSFORMING LIVES AND HEALTH SYSTEMS

In 2024, Evercare advanced its social impact across all markets by focusing on access to care, community outreach, staff development, and inclusive systems. Our efforts reached tens of thousands of people, especially in underserved regions, through programmes designed to respond to local needs and improve long-term health outcomes.

In Kenya, Avenue Healthcare significantly scaled up its community engagement in 2024, conducting 402 medical camps that reached more than 100,000 individuals, including vulnerable populations in Kibera, Mathare, Nanyuki, and other underserved areas. These camps provided free screenings for over 13,000 people for non-communicable diseases, blood pressure, and BMI, alongside deworming for children under five and immediate ambulance referrals when needed. In parallel, Avenue delivered 535 health talks to over 73,000 community members, promoting early detection and preventive care. More than 2,070 patients benefited from subsidised specialist care across 32 clinical specialties. Avenue also launched Kenya's first pulmonology cryobiopsy and electrocautery procedures and first home-based nursing service, marking important clinical milestones. Through the "Hear This, Kenya!" initiative, over 15,000 children were screened for hearing loss, resulting in 20 life-changing cochlear implants. Patient satisfaction remained high, with Avenue recording an index of 89.4%.

In Pakistan, Evercare Hospital Lahore continued to lead in public-private healthcare innovation. Its outreach teams engaged over 5,400 individuals through health education and screenings, with an additional 860 people supported through medical camps. Under the national Sehat Sahulat Program, the hospital delivered free inpatient care to 17,781 low-income patients, covering cardiology, dialysis, surgery, and other critical services. Lahore also trained 259 medical interns, helping build a strong pipeline of healthcare talent. The hospital performed 46 cochlear implants in partnership with the Punjab Police and conducted over 99,300 clinic consultations and 5,100 surgeries during the year. Lahore continued to advance clinical excellence by performing Pakistan's first Endoscopic Sleeve Gastropasty and expanding its team to include 73 consultants across 31 specialties. Patient satisfaction at Lahore stood at a strong 90%.

In Nigeria, Evercare Hospital Lekki expanded its community health efforts through mobile health camps that screened more than 1,100 individuals and wellness drives that reached an additional 340 people. The hospital facilitated health education sessions for over 23,000 community members, raising awareness on preventive care. Through the Lekki Circle Programme, 313 low-income individuals living nearby received discounted medical services. In collaboration with Smile Train, Lekki performed five cleft surgeries for underserved children. The hospital now hosts 30+ in-house multi-specialty consultants, and marked key clinical milestones including Nigeria's first infant laparoscopic pyeloplasty and the continued success of its Open-Heart Surgery Program. Importantly, 51% of patients at Lekki live on less than \$6.85 per day, highlighting the importance of inclusive, affordable care. Lekki's patient satisfaction index stood at 85%, reflecting its commitment to compassionate service delivery.

AVENUE HEALTHCARE (KENYA)

- > **402** medical camps | **100,000+** people reached
- > **535** health talks | **73,000** participants
- > **13,000+** screened for non-communicable diseases
- > **15,000+** children screened for hearing loss
- > **20** cochlear implants
- > **2,070+** patients served through subsidised specialist care
- > **32** clinical specialities
- > First pulmonology cryobiopsy and electrocautery procedures in Kenya
- > First home-based nursing service

EVERCARE HOSPITAL LAHORE (PAKISTAN)

- > **5,400+** reached through outreach
- > **860** supported through camps
- > **17,781** low-income patients treated under Sehat Sahulat Program
- > **259** students trained in structured internships
- > **46** cochlear implants conducted in partnership with Punjab Police
- > First Endoscopic Sleeve Gastroplasty in Pakistan
- > **73** Consultants onboarded in **31** different specialties
- > **99,300+** Clinic Consultation.
- > **5,100+** Surgeries

EVERCARE HOSPITAL LEKKI (NIGERIA)

- > **1,100** screened at health camps
- > **340** reached via wellness drives
- > **23,000+** reached through health talks
- > **313** low-income patients supported through Lekki Circle Programme
- > **5** cleft surgeries through Smile Train partnership
- > **51%** of patients live below **\$6.85/day**
- > **30+** In-House Multi-Specialty Consultants
- > First Infant Laparoscopic Pyeloplasty
- > Successful Open Heart Surgery Program

Digital tools like our open clinic app helped overcome geographic barriers and enable remote consultations, particularly in hard-to-reach areas. Strategic partnerships also provided subsidised services for corporates, schools, and faith-based groups.

“Our impact isn’t measured in buildings or beds—it’s reflected in the number of lives reached beyond our hospital walls.”

Patient spotlight: Blessing's Story

Born into silence, Blessing once lived in a world without sound. Thanks to the cochlear implant and speech therapy provided by Avenue Healthcare and Evercare, she now hears voices, music, and the world around her. She continues to progress through therapy and has started to speak, her development is a direct result of accessible, compassionate care.

She continues to thrive through speech therapy, growing more confident each day as she finds her voice. This is more than a medical success, it’s a story of restored hope, unlocked potential, and the power of compassion to transform a life.

Blessing can now hear the world around her, and for the first time, the world can hear her.

We continued to invest in people. The Evercare Capability Acceleration Programme (ecap) trained over 100 emerging leaders through modules focused on governance, patient-centred care, and strategic planning. Group-wide, more than 142,000 training hours were delivered, strengthening clinical skills, infection control, and digital literacy.

HUMAN-CENTERED DESIGN THINKING AT EVERCARE: TRANSFORMING CARE FROM THE INSIDE OUT

Human-Centered Design Thinking (HCDT) is a collaborative, empathy-led approach to healthcare innovation that puts patients, families, and frontline staff at the heart of problem-solving. In 2024, Evercare trained over 85 staff through flagship HCDT programmes at Evercare Hospital Lahore and Evercare Hospital Lekki, applying the Stanford d.school's five-step framework: Empathy, Define, Ideate, Prototype, and Test.

In Lahore, teams focused on ICU and critical care, leading to the creation of Empatheon, an empathy-based care model. Early results included stronger staff morale, more compassionate communication, and fewer complaints.

In Lekki, the programme addressed emergency care challenges, resulting in four low-cost prototypes to improve referrals, communication, and coordination.

These initiatives strengthened:

- Staff collaboration and confidence
- Triage accuracy and care delivery
- Patient and team experience

Looking ahead, HCDT will be embedded more deeply into Evercare's leadership, quality, and innovation initiatives, supporting scalable, empathetic solutions across the network.

Equity and inclusion were also key focus areas. Women represented 53% of our 4,500 employees, and 38% of leadership positions. Hiring practices, bias training, and staff engagement efforts supported inclusive work environments across all countries.

Group Gender Equity Snapshot

We expanded tailored care services such as a new homecare programme and LiveGood in Kenya—a hybrid model offering chronic care for diabetes and hypertension through a mix of in-person and virtual support.

Youth internships and staff development programmes also helped build a stronger healthcare workforce for the future, ensuring clinical and non-clinical teams are equipped to meet growing patient needs.

Across the Group, our social impact efforts helped reduce disparities, improve health access, and strengthen healthcare systems from the ground up.

PATIENT STORIES: LIVES TRANSFORMED BY COMPASSIONATE CARE

EVERCARE HOSPITAL LAHORE

"I highly recommend Evercare. I went to the hospital with my husband and had to admit him to the emergency ward for an upset stomach and dehydration issues. The gentleman at the front desk was super helpful and fielded my questions with compassion and promptness. We were then sent to the ER to see Dr. Maria K. who was able to talk to my husband in English and answered his questions with care. The staff periodically checked on us and showed great attention to our situation. Clean hospital, quiet and orderly ward, efficient ward-to-pharmacy route, affordable bill, etc. Thank you, Evercare." – ER Patient

EVERCARE HOSPITAL LEKKI

"Dr. Thompson and Dr. Adeyeye gave me the confidence to proceed with surgery I once feared. They treated me with empathy and reassurance, even playing music during the procedure to calm my nerves. I'm going home stronger and full of gratitude. You don't need to go abroad for world-class care, Evercare is here." – Orthopedic Surgery Patient

"Nurse Amaka made my baby's vaccination visit unforgettable. Her kindness, professionalism, and ability to connect made us feel like family. She even sang to calm him down. Evercare's people truly care." – Parent, Pediatric Services

Kelechi's baby boy was constantly vomiting and losing weight, and despite visiting multiple hospitals including in the USA, they couldn't get a clear diagnosis. Everything changed when they came to Evercare Hospital Lekki, where Dr. Arua Igwe quickly identified the problem as pyloric stenosis, a condition that prevents food from passing out of the stomach. The baby underwent a minimally invasive laparoscopic surgery, and his recovery was swift. He began eating properly and gaining weight again. Kelechi praised the care, saying "all the nurses were friendly, the environment was good," and added, "people don't need to go abroad for surgeries anymore, Evercare is here."

EXTENDING THE REACH OF IMPACT

The "Hear This" programme continued to be a flagship initiative, enabling life-changing cochlear implant surgeries for children from underprivileged families. This year, the programme facilitated 69 surgeries through partnerships with local hospitals and speech therapists, covering not only medical costs but also post-operative care and speech rehabilitation. For many of these children, the implants offered more than just sound, they unlocked opportunities for learning, participation, and belonging.

HEAR THIS!

HEAR THIS! 66 CHILDREN RECEIVED COCHLEAR IMPLANTS

Beyond clinical support, Evercare worked to build capacity within public and private health systems. We partnered with local training institutions to upskill community health workers and supported educational workshops in maternal health, hygiene, and disease prevention. These capacity-building efforts directly empowered communities to take ownership of their health outcomes.

In response to emergencies, Evercare provided humanitarian support during seasonal flooding in Pakistan, distributing hygiene kits, clean water, and essential medicines. Similarly, in Kenya, we contributed to nutrition and sanitation support for displaced populations affected by climate events.

Evercare also played a role in our broader ESG agenda, supporting green education campaigns in schools, tree-planting drives, and awareness programmes aligned with our environmental pillar, as well as helping to work towards our carbon reduction programs.

03

ENVIRONMENTAL STEWARDSHIP – BUILDING GREEN, RESILIENT HEALTHCARE

In 2024, Evercare took concrete steps to reduce its environmental footprint across hospitals in Pakistan, Kenya, and Nigeria. Focus areas included renewable energy, water conservation, waste reduction, and efficient infrastructure.

Solar energy was expanded across the network. Evercare Hospital Lahore installed a 335KWp solar system that generated over 134,000 kWh and cut energy use per patient by 27.3%. Avenue Healthcare saved more than 126,000 kWh through solar use, reducing 88.7 tonnes of CO₂ emissions. Evercare Hospital Lekki prepared for the installation of a 330KWp solar system that will be installed in 2025

27.3% energy reduction per patient

AVENUE HEALTHCARE KENYA

126,387 kWh saved 88.7 tonnes CO₂ offset

EVERCARE HOSPITAL LEKKI

330KWp system in progress

Water use was also addressed. Evercare Hospital Lahore reduced consumption per patient episode by 17.7% through conservation measures and chlorination dosing. Evercare Hospital Lekki used treated boreholes to provide over one million cubic metres of water monthly. Avenue Healthcare's switch to bottle-less water dispensers saved 246 m³ of water and eliminated over 13,000 plastic bottles.

AVENUE HEALTHCARE KENYA

246 m³ H₂O saved
13,000 plastic bottles avoided

EVERCARE HOSPITAL LEKKI

1M+ m³ H₂O recuperated from boreholes

Waste management systems were improved to increase recycling and reduce landfill use. Avenue Healthcare recycled 65% of its medical waste, well above its 40% target, turning 144,000 kg into paving blocks. The hospital also composted 48,000 kg of food waste. Evercare Hospital Lekki recycled 93,500 kg of plastic. At Evercare Hospital Lahore, a new wastewater treatment plant and thermographic testing system were introduced to enhance sustainability and energy safety.

Environmental projects also supported local communities. Avenue Healthcare planted 6,360 trees in Kenya. In Pakistan, Evercare Hospital Lahore partnered with authorities to conduct vehicle emissions testing and improve air quality in the surrounding area.

Kenya: 6,360 trees planted

Pakistan: Emissions testing site

Evercare’s environmental work was recognised internationally. The Group was named a global finalist in the IHF Low-Carbon Healthcare Awards and honoured by the Africa HealthEx Awards for its sustainability approach.

LEED Gold Certification Evercare Hospital Lahore

Lahore maintained its LEED Gold Certification for Building Design and Construction, reflecting its commitment to efficient hospital design and operations.

All hospitals continue to work toward reducing energy and water use per patient, applying efficient lighting, eliminating single-use plastic, and optimising resource use. These actions form a key part of Evercare’s ESG strategy and support the long-term resilience of its healthcare systems.

FUTURE INITIATIVES

As Evercare continues to drive impact across its markets, we are also laying the groundwork for the future. A major milestone in 2025 will be the Evercare Health Conference, taking place in Lagos, Nigeria from November 1–4.

With the theme *Connected Care: Healthcare Transcending Borders*, the conference will bring together clinicians, researchers, hospital leaders, investors, and policymakers to explore the future of patient-centred, technology-enabled care. Key sessions will focus on GenAI, digital health, clinical excellence, leadership, and equity.

Through plenaries, breakout sessions, simulations, and an investor pitch competition, the conference will showcase innovations and foster partnerships to advance healthcare in emerging markets. It reflects Evercare's growing role not just as a provider, but as a convener for knowledge-sharing and system transformation.

Looking ahead, Evercare is poised to:

- > Expand our green building designs to more hospitals across Africa and South Asia.
- > Deepen impact reporting and ESG transparency using a standardised in-house digital tool.
- > Continue philanthropic healthcare programs through the group in underserved regions to improve health outcomes, addressing specific needs of their communities. These programmes will focus on various aspects like such as research, access to care, disease prevention, and public health education.
- > Pursue third-party sustainability certifications for our hospitals.

These forward-looking efforts build on the momentum of 2024 and signal our continued commitment to transforming healthcare, creating systems that are sustainable, equitable, and future-ready.

CERTIFICATIONS/ACCREDITATIONS

AVENUE HEALTHCARE KENYA

UN Global Compact Membership - Jan 2024 - Significance: Demonstrates Avenue Group's commitment to aligning operations and strategies with ten universally accepted principles in the areas of human rights, labour, environment, and anti-corruption.

NEMA-Registered Medical Waste Partner (ECCL) - Partner: ECCL Waste Management Company Kenya - Significance: Ensures Avenue's hazardous and medical waste is disposed of in an environmentally responsible manner, complying with Kenya's National Environment Management Authority (NEMA) regulations.

KENAS Laboratory Accreditation - Accrediting Body: Kenya Accreditation Service (KENAS) - Scope: Clinical laboratories at Avenue Hospitals - Significance: Confirms adherence to international standards of quality and competence in medical laboratory services, ensuring reliable diagnostics and patient safety.

COHSASA Accreditation - Avenue Hospital Parklands - Accrediting Body: Council for Health Service Accreditation of Southern Africa (COHSASA) - Significance: Validates that Avenue Hospital Parklands meets internationally recognized standards for patient safety, clinical governance, and hospital quality improvement. It reflects a rigorous commitment to continuous improvement in healthcare delivery.

EVERCARE HOSPITAL LAHORE

Punjab Healthcare Commission: Evercare Hospital Lahore is accredited by the Punjab Healthcare Commission (PHC), the official regulatory body responsible for overseeing healthcare quality and safety in the province. This accreditation signifies the hospital's full compliance with national regulatory standards and PHC's Service Delivery Standards, ensuring that our clinical practices, patient safety protocols, and service quality meet the benchmarks set by the Government of Pakistan.

LEED Gold Certification (Building Design + Construction): Evercare Hospital Lahore is proud to be LEED certified in Building Design and Construction. This prestigious certification highlights our commitment to sustainability, energy efficiency, and environmentally responsible building practices. As a LEED-certified facility, we prioritize green infrastructure while maintaining excellence in healthcare delivery.

EVERCARE HOSPITAL LEKKI

Lagos State Waste Management Authority (LAWMA) – Government agency responsible for the evacuation, treatment and final disposal of both general waste and biomedical wastes. Certificates for the evacuation of each type of waste are issued on a yearly basis and those of 2024 are available.

Health Facility Monitoring and Accreditation Agency (HEFAMAA) – This is a government agency responsible for monitoring both private and public health facilities to ensure registration and accreditation of all health facilities in Lagos State. Registration and accreditation for 2024 has been completed and certificate is available.

Medical Rehabilitation and Therapist Board of Nigeria (MRTBN) – This is a government board that regulates and control professional practice of Physiotherapy, Occupational Therapy, Speech Therapy and Audiology in Nigeria either hospital based or otherwise. It also accredits clinical programmes for medical rehabilitation training and practice in the country. Certificate for 2024 has been issued.

Nigerian Nuclear Regulatory Authority (NNRA) – This is a federal government agency established with the responsibilities for nuclear safety and radiological protection regulation in Nigeria. It registers, licenses, inspects and enforces nuclear safety and radiological protection in all practices in the country. Certificate for 2024 has been issued.

Medical Laboratory Science Council of Nigeria (MLSCN) – This is a federal government regulatory agency that regulates the practice of medical laboratory science in Nigeria. It regulates the training of scientists, technicians and assistants in any institutions in Nigeria and give periodic accreditation to institutions including hospitals. Certificate for 2024 has been issued.

Lagos State Blood Transfusion Service (LSBTS) – This is a Lagos state agency that coordinates, accredits and regulates blood transfusion services in both public and private blood banks, to ensure safety of blood. Certification for 2024 has been issued.

Pharmacy Council of Nigeria (PCN) – This is a federal government parastatal charged with the responsibility of regulating and controlling pharmacy education, training and practice in all aspects and ramifications, including regulating Pharmacy Technicians and Patent and Proprietary Medicines Vendors (PPMVs). Certificate for 2024 has been issued.

Lagos State Wastewater Management Office – This is an agency under the Lagos state government that oversee wastewater management in Lagos State. The certificate for 2024 has been issued.

Federal Fire Service – This is a federal government body that conducts fire risk assessment and regulate fire services in public and private buildings. Certificate for 2024 has been issued.

Lagos State Water Regulatory Commission – This is a state government agency that ensures water supply and wastewater management services are properly carried out in Lagos State. Certificate for 2024 has been issued.

Thank You!

Until Next Year
